

D6

Critical Care Medicine

STAGE: Transition to Discipline

EPA D6: Coordinating rounds and supporting team members in the ICU setting

In this EPA the trainee is assessed on their ability to demonstrate collaborative leadership within the ICU. The trainee is tasked to manage early leadership aspects of the ICU including overseeing patient care and driving the delivery of the care plan. This EPA involves coordinating rounds, delegating tasks, oversight of junior trainees and overall management of the team and team dynamics.

With this in mind please assess whether the trainee:

	N/A	Need Attention	Developing	Achieved
DURING ROUNDS.....				
Actively listens to and engages in interaction with member of the ICU team				
Receives and appropriately responds to input from other health care professionals				
Engages in the managerial aspects of the team; demonstrating early leadership skills				
Identifies, records, prioritizes and answers learning needs that arise in daily work				
Uses cognitive aids such as procedural checklists, structured communication tools or care paths to enhance patient safety				
DURING DAILY ICU CARE...				
Coordinates investigation, treatment and follow-up plans when multiple physicians and health care professionals are involved				
Ensures follow-up of results of investigation and response to treatment				
PROFESSIONALISM....				
Demonstrates punctuality				
Completes assigned responsibilities				
Consistently prioritizes the needs of the patient				
Demonstrates a commitment to patient safety and quality improvement through adherence of institutional policies and procedures				

D6

Please assess your overall level of entrustment with the trainee :

“Coordinating rounds and supporting team members in the ICU setting”

Needs Attention	Developing	Achieved

Considering how the fellow’s performance met (or did not meet) expectation, please take the time to provide narrative feedback.

Professionalism and Patient Safety

Do you have any concerns regarding the trainee’s professionalism? No Yes

Do you have any concerns regarding patient safety? No Yes

If yes , description of concern:
